The 4GB YP-T10 MP3 player combines stylish design, incredible sound and convenient connectivity options. Its slim form allows it to fit comfortably in one's hand, while slipping easily into pockets and purses. With Digital Natural Sound engine (DNSe.) technology, high quality acoustics are possible providing a pleasurable listening experience. The YP-T10 also is equipped with Bluetooth-enabled wireless stereo providing the kind of listening one could only dream of.

bluetooth 2.0

Bluetooth lets these devices communicate with each other when they are in range. The devices use a radio communication system, so they do not have to be in line of sight of each other, and can even be in other rooms, as long as the received transmission is powerful enough. Bluetooth 2.0 is backwards compatible with 1.1 and 1.2. Bluetooth functionality allows for wireless headphones and integration with cell phones.

plays MP3 and WMA files

MP3 files are the most common music format available today. WMA uses better compression technology so users can have smaller files that sound as good as MP3. The YP-T10 will work with Rhapsody, Napster, and Yahoo! so users get access up to 4 million songs for less than the cost of a CD per month (separate subscription is required).

voice recorder

The T10 comes with a built-in microphone so users can record live sound as MP3 files onto the T10. The quality of the MP3 file is variable between 32/64/96/128 kbps. This will allow you to record long lectures or events without interruption.

video playback

MPEG4 files are the most common open video format available today. Samsung Multimedia Software is included with the T10, and transcodes the video on the computer before transferring to the T10, so files on the T10 play at the optimal frame size/rate with minimal effort from the user.

FM tuner/recorder with presets

The T10's built-in FM Tuner will scan the entire FM range in less than 60 seconds and automatically place the available FM stations into presets. To eliminate stations with marginal reception, users can adjust the sensitivity to only preset stations with strong reception.

photo and text viewer

You can view your photos and text files on the T10. Zoom for photos and custom text size and color provide powerful options to these great features.
